Please provide a description of the methods used to solicit community input on community needs (attach additional pages if necessary):

During the period January through June 2018, a Community Health Needs Assessment of the New London Hospital service area was completed by New London Hospital in partnership with Dartmouth-Hitchcock Alice Peck Day Memorial Hospital, Valley Regional Healthcare, Mt. Ascutney Hospital and Health Center, Visiting Nurse and Hospice for VT and NH, and the New Hampshire Community Health Institute. The purpose of the assessment was to identify community health concerns, priorities and opportunities for community health and health care delivery systems improvement. For the purpose of the assessment, the geographic area of interest was 15 municipalities comprising the New London Hospital service area with a total resident population of 32,912 people. Methods employed in the assessment included surveys of community residents made available on-line and paper surveys placed in numerous locations throughout the region; a direct email survey of key stakeholders and community leaders representing multiple community sectors; a set of community discussion groups; compilation of

results from assessment activities focused specifically on behavioral health needs and gaps; and a review of available population demographics and health status indicators. All information collection activities and analyses sought to focus assessment activities on vulnerable and disproportionately served populations in the region including populations that could experience limited access to health-related services or resources due to income, age, disability, and social or physical isolation..
